

Vote 'yes' to village of Crystal Lake on Nov. 7 Vote 'yes' to village of Crystal Lake on Nov. 7

Dear Editor: As objections to the proposed **village** of **Crystal** Lake bounce back and forth, I can recall way back to 1978 when the decision was being debated on the proposal to put in a sewer sys-tem at **Crystal** . What were the objections then • We didn't need it in the past and we don't need it now. • Charges to property owners will start out at \$15 and then go out of sight. • The lake area is OK. Just leave it alone. It'll take care of itself. • Somehow our property taxes will have to increase to help fund it. • It's only a bunch of newcomers pushing their pet ideas on us. • Next thing you know, they'll want an expensive office building.

• Why don't they just leave us alone and go fishing • Don't give me one of those pesky fliers. I've made up my mind. So now we have yet another new proposal — the creation of a **village** . Once again, after 28 years, we hear many of the same old arguments. The sewer system saved the lake from ruin and helped increase our property values. A **village** will turn out to be OK too. I urge folks to vote "yes" on Nov. 7 and then vote to put people you trust on the **Village** Charter Commission. And then, if you don't like the pro-posed charter, vote it down and send them back to fix it the way you want.

JEREMIAH STONE Crystal
